VISIBLE PEELING
The Perfect 10 Peel has been designed to provide what patients are after: a peel that actually peels and delivers desired results. In five steps, your patients will be on their way to beautiful skin.

Complements Treatments for:

- Dull and uneven skin tone and texture
- Fine lines and wrinkles
- Dark spots and sun damage
- Discoloration
- Large pores
- Skin roughness

Layered technology integrated with All-trans-Retinol Complex, proprietary acid blend and antioxidants

- Formulated for Fitzpatrick skin types I, II, III
- Safe and effective
- Yields predictable and optimized results
- Tolerability (less surface trauma & minimal discomfort)
- Easy to use single-dose application system
- Little to no down time

The Perfect 10 Peel is currently available in three strengths: Universal, Intermediate and Advanced.

Universal:
Formulated for all skin types including Fitzpatrick skin types I-II-III-IV-V-VI, sensitive skin and first time peel patients.

Intermediate:
For first time Fitzpatrick I-II-III peel patients and as a step up from Glycolic Acid, Salicylic Acid or similar peels.

Advanced:
Formulated for more tolerant Fitzpatrick I-II-III skin type patients as well as patients with Fitzpatrick I-II-III skin types who have been previously peeled with the Perfect 10 Intermediate Peel or other peels and are ready to step up to this Advanced formula.
PEEL PROTOCOL

PEEL FREQUENCY:

The Perfect 10 Peel can be scheduled in a series of two or more peels to achieve the patient’s desired results. There should be a minimum of one month separation between each peel.

The Perfect 10 Peel complements many popular aesthetic treatments including Botox and fillers.

WHAT TO EXPECT:

Patients can expect visible peeling within 2-3 days after the procedure, the peeling will last between 7-10 days.

Immediately post procedure, the patient should avoid direct sunlight and use a broad-spectrum physical sunscreen SPF 30 or higher. Beginning the evening of the peel and continuing for a minimum of 10 days, it is highly recommended that all patients cleanse with a Gentle Antioxidant Soothing Cleanser to ensure tolerance. Moisturize as necessary (it is not uncommon for the patient’s skin to be very dry especially during winter months). In the event the patient experiences irritation you may recommend a 1% hydrocortisone product.

It is advised that patients avoid exercise for one day after the peel procedure.

“In my practice, I found the Replenix® MD Perfect 10 Peels to be highly effective as an aesthetic in-office peel treatment and provided what my patients wanted in their peel. I particularly find that the ability to continue my patient’s Retinol treatments prior to the peel is a distinct advantage. Within 48 hours patients experienced actual visible skin peeling not associated with most superficial peels. These “Real Deal Peels” result in softer, smoother, more even toned skin.”

Cherie Ditre, MD - 10/1/2012

Who is not a candidate for The Perfect 10 Peel?
The use of this product is contraindicated in the following groups of patients:

- Patients who are nursing or pregnant
- Patients with rosacea, atopic dermatitis, seborrhea, connective tissue diseases (ex. Scleroderma), active inflammatory acne
- Patients prone to keloid formation and patients that have active herpes or warts
- Patients undergoing radiation and/or chemotherapy treatments
- Patients who have previously not tolerated topical retinoids and alpha or beta hydroxy acid products
- Not recommended for Fitzpatrick IV-VI skin types (Intermediate and Advanced Peels only)

Additionally, patients that are on isotretinoin should wait three (3) to six (6) months after their last dose to make sure their skin is no longer dry, red or peeling.

For questions please consult your physician or skin care provider

These medical grade, in-office, aesthetic treatments are formulated to deliver the desired results for the motivated patient that wants a peel. The hallmark of The Perfect 10 Peels is that they provide visibly apparent skin peeling. Within days the patient's skin will be smoother and softer with a more even-tone. The Perfect 10 Peels contain a synergistic blend of ingredients that visibly reduce the signs of aging. Each component of the system has been formulated with soothing and calming antioxidants to support these effective peeling agents. The first acid step in the peel (Step 2) contains a rich blend of well known and effective alpha and beta hydroxy acids and amino acids to maximize exfoliation and gentle peeling. The second active step in the peel (Step 4) features an All-trans-Retinol Complex to enhance and augment the effects of this uniquely powerful peel treatment.

The Perfect 10 Peels:
- Visibly improve many skin indications
- Support healthy skin function
- Offer strong efficacy
- Scientifically formulated blend of complementary ingredients

**CONVENIENCE** 10 minute peel little to no down time peel process is completed in 7-10 days

**COMFORT** Virtually painless peel minimal discomfort

**SUPERIOR QUALITY** Pharmaceutical grade ingredients optimized results

**TOLERABILITY** Well tolerated minimal irritation less surface trauma

**PREDICTABILITY** Peeling will be visible 2-3 days after the procedure

**SUPERIOR RESULTS** Highly effective blend of complementary acids yields results with just one treatment

**FAQ's**

Who should consider The Perfect 10 Peel?
Anyone who wants to maintain healthy skin function and improve their skin tone and texture, such as those patients with photo-damaged skin and uneven skin tones. Talk to your medical professional to determine which peel system is right for your skin conditions.

What types of skin respond well to the The Perfect 10 Peel?
Your skin care professional will determine if you are a candidate for The Perfect 10 Peel.

What should you know about the peel procedure?
The peel is applied topically, by trained and skilled skin care professionals. The entire procedure should take approximately 15 minutes. You will feel a slight tingling and heat sensation for a few minutes which subsides after STEP 4 application (All-trans-Retinol Complex).

How much will I peel?
The skin peeling, associated with The Perfect 10 Peel, is light to moderate, yet substantial and visible. Peeling generally starts 2-3 days after the peel, and should take about 7-10 days to completely peel and heal. You can start the antioxidant moisturizer the evening of the peel and continue until peeling is completed.

What results can you expect after the The Perfect 10 Peel?
- Smoother and softer texture
- Improved tone
- Youthful, radiant look
- Diminished appearance of wrinkles, fine lines and pore size
- Increased skin radiance and luminosity
- Reduction in the appearance of dark spots
- Unclogged pores

Will results be long lasting?
The Perfect 10 Peels results will last as long as your skin is maintained with a proper Skin Care Regimen (as customized by your physician or skin care professional). The Perfect 10 Peel can be performed monthly or as determined by you and your skin care professional.

How many peels can you do and how far apart should they be done?
For most patients, we recommend a minimum of one month in between peels. The frequency and number of peels depends on various factors and should be determined by you and your skin care professional.

Will my skin be more sensitive after The Perfect 10 Peel?
Yes, the skin will be more sensitive during the active peeling and healing period (approximately 7-10 days). It is recommended you use an antioxidant moisturizer and sunscreen to protect your skin during this time and avoid direct sunlight. Soothing Recovery Ointment or 1% Hydrocortisone product may be recommended as necessary, depending on your level of sensitivity and dryness.

Can I go in the sun after The Perfect 10 Peel?
Avoid direct sunlight and apply a physical sunscreen, SPF 30 or higher, liberally, even on cloudy days.
